Thank you for purchasing ECX333 multimodal face recognition terminal! We believe that you've made a wise choice and will enjoy wonderful changes and joyful daily life together with global users who trust ECX333 multimodal face recognition terminal Every ECX333 multimodal face recognition terminal is produced with diligent efforts of Eyecool. Every component is the achievement of wisdom of numerous engineers. Our sophisticated skills and expertise been demonstrated in our excellent world-class products. With our unremitting efforts, we contribute to opening a wonderful and infinite life experience for all ECX333 users. We always strive to provide you with intimate and comfortable experience in all-round way, from products to services.

Disclaimers

We've tried our best to ensure the correctness and reliability of information provided in this manual, but it may have deviation before and during printing.

We may upgrade the product from time to time in order to improve the performance, reliability and installation of the components and systems. This may be inconsistent with the description in the manual, but it will not affect the actual operation. Please understand! The functions specified in this manual shall not serve as a reason for applying this product for special purposes. The company shall not bear any responsibility for the accidents and hazards caused by the mis-operation of the user.

1 Getting Started

1.1 Registration instruction

When using iris & face multimodal access control, please follow the steps below for operation involving registration or identification:

- (1) Stand in front of the iris & face multi-modal access control, and look at the screen of the access;
- (2) Make sure the eyes are within the preview box at the top of the screen. If the eyes are out of the preview box at the top of the screen, the camera will automatically adjust to align.

1.2 Startup

Connect the supporting power adapter at the interface, and the system will start automatically within 15 sec.

2 Product use

2.1 Device activation - Registration

(1) Select language after startup: Chinese and English

	Languages	
中文		~
English		

(2) Select local or network version after selecting language

<	Select network	Skip
Wired	l network	<
WIFI		
Doma	ain name setting	
Netw	ork certificate setting	

Local: Click skip in the upper right corner of the page to enter the local version with no need to select network;

Network: connect to the network for data interaction. The network can be connected via wire or WiFi.

Wired network: insert the cable, connect the wired network to save, upload and download the data.

WiFi: connect WiFi, save data, upload and download data.

Note: the application of local version is simpler than that of network version. You can register and activate by skipping some irrelevant steps. It is recommended to apply the network version. The registration and activation of the two versions are shown as follows.

(3) Local

 Select network 	< Date and time	Set door opening password and administrator password	Administrator	(a a)
Wired network ✓	Automatically confirm time	Please enter a new password	Enter name	$\{(\bullet)(\bullet)\}$
WIFI	Set date	Please confirm password	Enter phone number	0%
Domain name setting	Set time			
	24-nour clock applied			in i
		Carferr	Next stee	2
		Contirm	(Next step	

- Click "Skip" to enter the local version and select the date and time.
- Set door opening password and administrator password.

Enter and confirm the new password, click "Confirm", a prompt will pop up for

device or network check, and click Skip to enter the administrator registration page.

- Enter name and phone number.
- Enter the administrator registration interface and ensure the eyes within the preview box at the top of the screen at an appropriate distance. After 100% of the registration progress is completed, the successful extraction of iris feature will pop at the bottom of the screen, indicating that the registration of the local version is successful.
- (4) Network

- After selecting WiFi, select the WiFi to be connected and enter correct password; Or after selecting wired network, insert the network cable, turn on Ethernet to connect the wired network.
- Set the door opening password and administrator password: enter and confirm the new password, and click "Confirm", password setting is successful and jump to the administrator registration interface.
- Enter name and phone number.
- Enter the administrator registration interface and ensure the eyes within the preview box at the top of the screen at an appropriate distance. After 100% of the registration progress is completed, the bottom of the screen will prompt that the iris feature extraction is successful, data is uploaded and jump to main interface of identification, indicating that the registration of the network version is successful.
